

GOOD CONCEPTION RATES
TONY PECKENPAUGH

Blueprint®

TONY PECKENPAUGH

"I decided I wanted to step-up the nutrition on my cows, so in the spring of 2018, I switched to the Blueprint® program with Actigen®. I have been very pleased. We kept the cows on Blueprint with Actigen through summer and over the winter. Since being on that program, we've had really good conception rates. This spring, they bred back in time despite the challenging muddy, wet and cold conditions."

"We used Blueprint with ClariFly® this year on the registered cows and saw no pink eye. I also did the pink eye implant. The calves looked super and they were clean. I went down there one day after a rain and the cows were packed up around the corner because it was humid and there was mud and there were hardly any flies."
