AgraSlat®

TREAT DEEP PITS *Naturally*

SAFE, ALL-NATURAL, AND BIODEGRADABLE

ATTRIBUTES

- Liquefies sludge and slurry
- Liquefies manure for conditions not suitable for insect larva
- Slim dispenser that drops through any slat
- Easy to use, no mixing required
- Patented, time-release technology
- Cost effective
- Two applications per year
- Works at the bottom, where problems occur
- Proprietary blend of microbial isolates
- Biodegradable, corn-based resin dispenser

WHEN TO USE

- Need to reduce sludge layer
- To improve deep pit storage capacity
- To help prevent crusting and foaming
- To increase nutrient values of manure
- To make pumping easier
- To reduce odor
- Specifically engineered for use in filter barns
- If no access point for applying AgraSphere®

DIRECTIONS

SELECT DOSAGE

Each AgraSlat® treats up to 37,500 gallons

Swine Nursery, Grower, Finisher

Deep pits with less than 12 inches of retained bottom sludge

- Add 2 AgraSlats for every 200 head
Example: 1,200 head requires 12 AgraSlats
- Repeat every 180 days

Deep pits containing more than 12 inches of retained bottom sludge

- Add 2 AgraSlats for every 200 head
Example: 1,200 head requires 12 AgraSlats
- Repeat every 90-120 days
- Once depth reaches less than 12 inches, repeat every 180 days

Place AgraSlats evenly throughout the system

Swine Farrowing, Gestation, Breeding

- Add 2 AgraSlats for every 80 head
Example: 480 head requires 12 AgraSlats
- Repeat every 180 days

Crusted Systems

- Do NOT add when firm, heavy crust has accumulated
- Treat with Activator PLUS® prior to using AgraSlat
- Add AgraSlats once crust has been liquefied

Beef

- Speak with your Healthy Farms™ consultant

TREAT

Always treat to the total pit capacity

Place evenly throughout system

Repeat every 90-180 days, depending on pit conditions

Systems may need multiple treatments to return to normal operational efficiency
